

PROJECT EDDY + TAYLOR FAMILY HOUSING

Located at the southwest corner of Eddy and Taylor Streets, this family housing project will provide more than 100 one-, two- and three-bedroom units in a 14-story mixed-use building. Four roof decks will serve discreet uses, such as a rooftop allotment garden or a protected kids' play yard. The ground-floor commercial space is slated to house a mid-size grocery store. With a goal of LEED Silver Certification, this project will have such sustainable features as photovoltaic arrays, solar domestic hot water, and recycled materials.
