

Daniel Simons, AIA, LEED AP Principal, David Baker Architects

Daniel Simons, AIA, LEED AP, is a Principal at David Baker Architects. With more than 20 years of architectural experience—in design, construction document preparation, and construction administration—Daniel has focused on the field of multifamily housing. His projects include affordable housing and supportive housing for formerly homeless residents as well as market-rate developments and boutique hotels. Daniel guides the firm's sustainability initiatives and uses his extensive knowledge of green building practices and progressive city planning to minimize the buildings' environmental impact while improving the quality of life for residents.
