

# Brett Randall Jones AIA, LEED AP

**Principal / Brett believes that being connected with the community for which we are designing is essential to the creation of meaningful buildings.**

Brett is a key figure in DBA's hospitality practice and serves as Principal in Charge of DBA\_Workshop—our prototyping and fabrication shop—expanding shop capacity and facilitating opportunities to integrate original designs and custom pieces into DBA projects. After graduating from Auburn University with degrees in both Architecture and Interior Architecture, Brett joined the Rural Studio, where he designed large-scale community projects and low-income housing and developed extensive construction knowledge through several self-built projects. Brett moved from Hale County, Alabama, to join DBA in early 2011.
