

Daniel Simons FAIA, LEED AP

Principal / With more than 20 years of architectural experience—in design, construction documents, and construction administration—Daniel has focused on the field of multifamily housing.

Daniel's award-winning projects include affordable senior and family housing, supportive housing for formerly homeless residents, modular housing, and market-rate mixed-use developments. Daniel uses his extensive knowledge of green building practices and progressive city planning to minimize the buildings' environmental impact while improving the quality of life for residents.
